Experienced leaders with modern solutions

- ★ Our founders are experienced in dental insurance sales
- ★ Private practice
- ★ Managing dental provider networks
- ★ Healthcare technology
- ★ Gamifying health care for patients

Dental insurance policyholders generally:

1. Are dissatisfied with their dental benefit when they have difficulty in accessing care, usually when they have a pain event.
2. Policyholders were interested in getting care once they were in pain, AND WHEN THEY WANTED THE HELP.
3. The pain element being addressed would have led to an increase in satisfaction of their insurance policies.

What is Teladentistry?

Teladentistry is:

1. A way to **increase accessibility** in both rural and urban areas.
2. Immediate access to a dentist during the an emergency
3. A way to help policyholders 24/7 with a benefit that adds value.
4. A way for a policyholder to choose when they want to go to the dentist for definitive care.
5. A better choice than going to the ER for routine dental emergencies.

Teladentistry
solves the problem

Bringing dentistry into the internet age

- ❑ Average callback time is 25 minutes and guaranteed within three hours.
- ❑ Help patients avoid the ER
- ❑ E-prescriptions sent to the local pharmacy or mailed to their address. (Our service does not allow for controlled substance prescriptions)
- ❑ One app install with advanced technology to help patients.

Positioning of the added value service

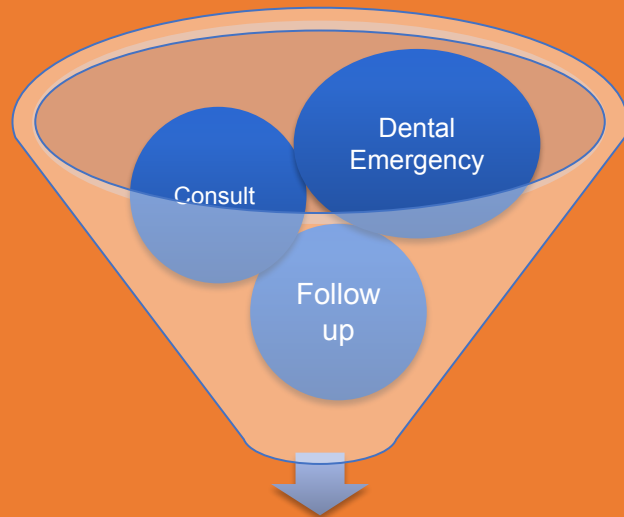

Simple to deploy

- ❑ All patients get access to our app which can be downloaded to any internet enabled device.
- ❑ Our Kiosk and telehealth cart solutions can be deployed in ER or other high traffic areas.
- ❑ Services are billed to insurance as per contract
- ❑ Patients are referred to in-network dentists avoiding out of network reimbursement rates for dental insurance companies.

Funnel effect

**Reduced costs for
insurers**

How to reduce costs >>> *Fast.*

1. As soon as a patient has a pain event they consult with a teladentistry.com dentist.
2. Quick evaluation helps the patient avoid ER potentially (Millions of savings here)
3. Antibiotics and Pain killers are prescribed (no controlled substances).
4. Patient is referred to in-network dentist to provide local care.
